SUMMARY

Product designer with a strong UX/UI foundation, focused on complex, high-stakes products. I take work end-to-end — from research and problem framing through information architecture, user flows, and high-fidelity UI — turning tangled problems into clear, usable systems. I've designed across SaaS, B2B, consumer, health, travel, and leadership products, and work closely with engineering and stakeholders to ship.

EXPERIENCE

UX/UI Designer — Cozmotec (Ireland · Remote) Jan 2025 – Present

- Own product design end-to-end on every project — from discovery and problem framing through information architecture, user flows, wireframes, and high-fidelity UI.
- Designed **Company Bureau**, the operating system for an Irish & UK company-formation firm — turning a fragmented, rule-heavy compliance process spread across five platforms into one connected system, from enquiry to incorporated company.
- Shaped complex service workflows into clear, stage-aware pipelines — automating the busywork while prompting people where judgment matters, and keeping every step visible and trackable.
- Delivered products across domains — operations, travel, health, and leadership — adapting research and design to each audience and problem.
- Built reusable UI patterns and a consistent design language so products scale across services, teams, and client types.
- Worked closely with engineering, founders, and business stakeholders — translating requirements into shippable designs and iterating from real feedback.

3D Artist — Ananta Games (Delhi) 2023 – 2024

- Produced 3D art and game assets to tight technical and artistic constraints — the foundation for the craft, detail, and problem-solving that shape my product work today.

SELECTED PROJECTS

Company Bureau — SaaS · Operations (Cozmotec). The operating system for an Irish & UK company-formation firm — a fragmented, rule-heavy compliance process across five platforms, redesigned into one connected system from enquiry to incorporated company. Owned IA, the stage-aware pipeline, client 360, and recurring-services tracking.

Oroko Travel — Travel (Cozmotec). The operating system for an Ireland-based luxury travel agency — a connected itinerary builder (trips, customers, suppliers, and billing in one) so the team designs the trip and the relationship as one. Includes Oroko Private, a VVIP module that protects high-profile travellers' identities.

Building Bones — Health. Digital platform helping people with low bone density and osteoporosis train safely — personalised exercise programs, guidance, and community.

Statr Draft — Product · Sport. Time-boxed draft windows for football leagues — turning a chaotic free-for-all into a paced, fair event.

DASH Leaders — Leadership. Product design for a leadership-development platform.

SKILLS

Design	Product Design, UX/UI Design, Interaction Design, Visual Design
Discovery & Research	User Research, Problem Framing, Requirements Gathering, Journey Mapping
Architecture & Flows	Information Architecture, User Flows, Wireframing, Prototyping
Design Systems	Design Systems, Component Libraries, Responsive Design, Design Handoff
Tools	Figma, Figma Make, Framer, Claude Design, Photoshop, After Effects, Premiere Pro, Canva
Domains	SaaS, B2B, Consumer, Health, Travel, Leadership
Ways of working	Cross-functional Collaboration, Stakeholder Management, End-to-end Ownership

EDUCATION

IGNOU — Indira Gandhi National Open University · BA in Sociology 2019 – 2023

MAAC — Maya Academy of Advanced Cinematics · Creative Design 2019 – 2023
